Date: Monday, April 27, 2026 at 3:28:49 PM Eastern Daylight Time

From: Malisova, Anna (DI SW GS&CS MXRM AMS PRS IND2)

To: Calbraith, Stephen (DI SW GS&CS AM GCO ESAMS SD TS 2), Chin, Nicholas (DI SW GS&CS AM GCO ESAMS SD TS DST), McNicholas, Austin (DI SW GS&CS AM GCO ESAMS SD TS 1), Sherr, Zachary (DI SW GS&CS AM GCO ESAMS SD)

Hi Team,

Below is an email I sent to Amphenol prior to the custom demo that listed out the key functionality shown in the demo.

Best,

Anna

Subject: Re: Amphenol Fiber Systems: Mendix Conversation

Hi All,

Thank you for your time today! Based on our conversation, I've included some additional information about Mendix version control and our security certifications below:

Mendix Team Server (Git Repository)

Mendix Team Server is a controlled versioning repository built on Git for versioning application models created in Mendix Studio Pro. Mendix Studio Pro handles model commits, branching and merging, ensuring the app model stays valid, and the platform leverages APIs to connect to the repository. More information about Team Server can be found [here](#) and more information about the App Repository API, including authentication, can be found [here](#).

Mendix Security & Compliance

The Mendix [Trust Portal](#) is a great place to find information about our platform security and compliance certifications. Additionally, [Mendix Cloud for Government](#) is our PaaS offering that meets FedRAMP standards and is [on the FedRAMP marketplace](#).

Mendix Demo

Additionally, I've listed a few key focus areas for the upcoming demo. Please let me know if there's anything else that's top of mind as part of your evaluation of Mendix.

- The developer experience for building workflows

- o Ability to assign tasks to "buckets" of users
 - o Ability for a manager within a certain bucket to assign a task to one of the people on their team
 - o Ability to track assignment of a user task
 - o Ability to reassign a task if a user is out off the office or on vacation
 - o Ability to build workflows that are somewhat circular in nature and may go back and forth between steps
- The developer experience for building pages

Best,

Anna

Where: Microsoft Teams Meeting

Good morning Shawn,

Looking forward to introducing you to the Mendix team and exploring how we can support both your disconnected systems and the maintenance of your current environment.

Please feel free to forward this invitation to anyone else who would benefit from joining the call.

Thank you,
Amanda & Siemens Team
